

VeriFace: Security for Daycare Centers

Creating Safe Spaces for Our Most Precious Assets

Focus on Safety & Threat Detection: Amid rising safety concerns, VeriFace provides proactive, real-time monitoring, rapid threat detection, and instant alerts, ensuring a secure environment for children, peace of mind for educators, and reassurance for parents.

Key Features & Benefits:

- **Enhanced Safety:** Immediate alerts regarding known risks.
- **Proactive Threat Detection:** Rapidly identifies unfamiliar faces and alerts administrators instantly.
- **Effortless Integration:** Seamlessly integrates with existing security systems and CCTV networks.
- **Reliable & User-Friendly:** Intuitive interfaces facilitate swift responses by your staff.

Notification Systems:

- **98% Accuracy Rate:** Industry-leading facial recognition.
- **Customized Alerts:** Instant notifications via text, email, or phone push tailored to your organization's protocol.
- **Instant Response:** Swift threat verification reduces risk and maintains uninterrupted learning environments.

Secure your institution with advanced protection.

VeriFace

Using proprietary Facial Recognition software, AI, and Cloud Computing, we provide a fully autonomous, dynamic, and accurate system for accountability and attendance. We simply load images of authorized parents/guardians into your database and you're up and running.

A facial recognition-based attendance verification system that:

1. **Recognizes** parents/guardians upon entry.
2. **Matches** them to their child(ren) in the database.
3. **Sends** a text message to confirm drop-off/pick-up.
4. **Updates** attendance records accordingly.
5. **Displays** attendance data within the dashboard.

The system will text and respond to an Authorized Parent/Guardian as follows:

VeriFace: Hello Mr. Smith. Are you here to Pick Up or Drop Off?

Radio Button (1) : Pick Up

Radio Button (2) : Drop Off

Mr. Smith: Drop Off

VeriFace: Okay, which child(ren)?

Radio Button (1) : Emily

Radio Button (2) : Michael

Radio Button (3) : Both

Mr. Smith: Both

VeriFace: Okay, you're all set. Have a great day!

Timestamped images of all adults entering the facility will be immediately posted to the SafeZone Dashboard monitoring system. Detection of Unauthorized/Unknown individuals will trigger an immediate alert on the Dashboard, prompting staff to address their presence.

**Texting an Alert to chosen staff in the event Unknown individuals are identified is also configurable in the system.*

Instant Verification

VeriFace will instantaneously compare live images to those in the database and text authorized patrons to ascertain the purpose of their visit (Pick Up/Drop Off) and which child(ren) is/are involved.

Chain of Custody

VeriFace creates a "chain of custody" for the children in your care, dynamically automates attendance record keeping, and provides peace of mind in knowing exactly which children are in your facility at any given time.
